**CIRCULAR**

India is facing the second nationwide wave of Covid-19 pandemic, which has prompted some states to re-impose strict curbs, including partial and complete lockdowns, to tackle the contagion.

To come out from the present difficult situation, the following needs to be implemented by the staff and students of this Institute:-

- The students and staff need to take vaccination, as the registration is now open for all 18 + years of age and the vaccination drive starts from 1st May 2021. The COVID-19 vaccination, notably, is one of the safest ways to help build protection against the virus. It is mandatory for the students to get vaccinated before the physical classes' resumes after the second wave is over. Those getting complete shots could join physical classes when it happens.
